CLEANING AND MAINTENANCE
PLASLINE #800, 850, OR #900 CEILING SYSTEM

Plasline ceilings are supplied in cardboard boxes. The profiles should be clean; however, any dirt can easily be removed by the application of a non-abrasive, solvent-free cleaner.

In certain situations, there may be a tendency for the profiles to attract dust due to static electricity. This problem can be avoided by wiping strips with a damp rag to create an anti-static barrier. Generally, any static will disappear after one or two wipings.

NOTE: do not use abrasive cleaners having particles that will scratch the surface of the ceiling. Once installed, Plasline is virtually maintenance free – requiring only occasional wiping with a damp cloth, or with a mild detergent solution.

The Rulon Team of experienced professionals is available to assist in any questions that may arise. For assistance, please contact Rulon at: 800-227-8566 or 904-584-1400.
